

United States Senate

WASHINGTON, DC 20510

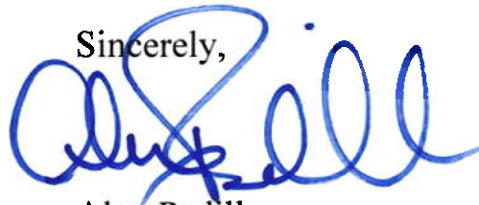

May 15, 2024

The Honorable Patty Murray
Chair
Senate Committee on Appropriations
United States Senate
Washington, DC 20510

Dear Chair Murray,

I certify that neither I nor my immediate family has a pecuniary interest in any of the congressionally directed spending items that I have requested in the Fiscal Year 2025 Subcommittee on Interior, Environment, and Related Agencies Appropriations Bill, consistent with the requirements of paragraph 9 of Rule XLIV of the Standing Rules of the Senate. None of the entities for which I have requested congressionally directed spending are for-profit entities.

Sincerely,

Alex Padilla

**Padilla, Alex(D-CA) Interior and Environment
Congressionally Directed Spending Requests**

Recipient Name	Project Purpose	Project Location	Amount Requested (\$000)
Oro Loma Sanitary District	The Project will provide retrofit upgrades to ensure the continued functioning of the vital wastewater biosolids treatment process in the face of a catastrophic earthquake, and includes the design, purchase, and construction of the necessary facility components.	Alameda CA	\$5,000
U.S. Fish and Wildlife Service, San Francisco Bay National Wildlife Refuge Complex	The project will protect and restore 430 acres of wetland ecosystems, and protect Newark and Fremont from the effects of climate change.	Alameda CA	\$5,000
Amador Water Agency	Funding to replace aging well and expand treatment plant capacity.	Amador CA	\$5,000
Butte County Resource Conservation District	The Colby Mountain Project incorporates the development of over 40 miles of new, non-motorized singletrack, an interpretive forest education trail, expanded trailhead amenities, and improved connectivity of existing OHV routes.	Butte CA	\$3,000
City of Adelanto	Funding to facilitate the planning and building of a high-pressure water main to enhance the existing water distribution system.	City of Adelanto CA	\$3,200
City of Adelanto	Funding to expand current existing wastewater treatment facilities, enhance tertiary treatment processes for recycled water, update the sewer master plan, and upgrade sewer collection systems.	City of Adelanto CA	\$2,800
City of Beaumont	Funding to upgrade of the pump system at Mesa Lift Station.	City of Beaumont CA	\$2,000
City of Chino Hills	Funding would construct a new 6,000 foot long recycled water main.	City of Chino Hills CA	\$2,000
City of Fullerton	Funding to install and implement advanced metering infrastructure equipment.	City of Fullerton CA	\$2,240
City of Irvine	Funding to reduce stormwater runoff by constructing landscaping that provides additional stormwater capture filtration.	City of Irvine CA	\$1,000
City of La Palma	Funding to construct treatment facility and address groundwater and drinking water quality.	City of La Palma CA	\$5,000
City of La Palma	Funding to upgrade the City of La Palma's groundwater well to protect groundwater supplies.	City of La Palma CA	\$4,800
City of Long Beach	Funding to support equipment, design, and permitting costs for a marine debris and trash capture system at the Los Angeles River.	City of Long Beach CA	\$3,000
City of Long Beach	Funding for the City's Stormwater Master Plan to reduce chronic flooding, improve flood resilience, and create climate resilient infrastructure.	City of Long Beach CA	\$1,200
City of Los Angeles, Department of Water and Power	Funding to support construction of stormwater features such as infiltration galleries, diversion structures, pre-treatment systems, etc.	City of Los Angeles CA	\$5,000
City of Los Angeles	Funding for the installation of a new, reliable, and sustainable motor control center to power the Truck Loading Facility at the Hyperion Water Reclamation Plant.	City of Los Angeles CA	\$4,500

City of Los Angeles	Funding to support laboratory testing to ensure that water quality objectives are met at the Hyperion Advanced Water Purification Facility and the Membrane Bioreactor.	City of Los Angeles CA	\$3,000
City of Maywood	Funding to complete prioritized sewer repairs and make critical improvements to prevent future sanitary system overflows and breakages in pipes, and blockages in its sewer system.	City of Maywood CA	\$2,000
City of Modesto	Funding for construction of a basin and lift station to prevent stormwater flooding.	City of Modesto CA	\$3,200
City of Modesto	Funding to complete rehabilitation of well, including for fire flow improvements.	City of Modesto CA	\$4,500
City of Modesto	Funding to strengthen & replace water mains along three bridge overcrossings, across Highway 99.	City of Modesto CA	\$1,900
City of Norwalk	Funding to install permeable paving to improve stormwater capture and groundwater recharge.	City of Norwalk CA	\$1,547
City of Oxnard	Funding for existing stormwater system improvements.	City of Oxnard CA	\$2,000
City of Oxnard	Funding for the repair and replacement of existing equipment, including membrane replacement and installation of valves and actuators to allow clean-in-place automation.	City of Oxnard CA	\$1,600
City of Oxnard	Funding to replace identified aging cast iron waterline pipes at risk of failure.	City of Oxnard CA	\$1,600
City of Palm Springs	Funding to construct underground storm drain with catch basins, manholes, and transition structures to its terminus.	City of Palm Springs CA	\$2,250
City of Patterson	Funding to enhance the Water Quality Control Facility by adding a membrane bioreactor to produce possible non-potable effluent for citywide irrigation.	City of Patterson CA	\$5,000
The City of Roseville, Environmental Utilities Department	Funding for planning, environmental compliance needs, and preliminary design to ensure the delivery of a sustainable, affordable, and reliable water supply to Roseville and Placer County.	City of Roseville CA	\$3,000
City of Sacramento	Funding replace capacity of groundwater well where PFAS was detected.	City of Sacramento CA	\$3,000
City of San Buenaventura	Funding to install a Membrane Bioreactor at the City's wastewater treatment plant as part of VenturaWaterPure, a larger potable reuse program that will recover, treat, and reuse water.	City of San Buenaventura CA	\$2,000
City of San Diego	Funding to upgrade an existing drainage system and improve water quality and habitat by restoring degraded channel.	City of San Diego CA	\$5,000
City of San Diego	The Project proposes electrical, structural, and mechanical improvements to increase pump station capacity and upgrade the components to the current standard requirements to be able to handle severe storm events brought on by climate change.	City of San Diego CA	\$5,000
City of Santa Paula	Project to construct new pipelines to improve water transmission.	City of Santa Paula CA	\$2,000
City of Santee	Funding to construct a truck dumping and de-watering and wash station at the to separate solid waste, dirty stormwater, and sediment from storm water maintenance activities, heavy equipment washing and direct soiled water to the sanitary sewer system.	City of Santee CA	\$880
City of Seal Beach	Funding will support design of stormwater infrastructure improvements to mitigate neighborhood flooding in the City of Seal Beach.	City of Seal Beach CA	\$4,800

City of Seal Beach	Funding for design phase for project to mitigate trash migrating from the San Gabriel River to the beaches and ocean in the City of Seal Beach.	City of Seal Beach CA	\$1,000
City of South Gate	Funding for a PFAS treatment facility project that is currently in the design phase.	City of South Gate CA	\$2,900
City of Thousand Oaks	Funding would provide advanced metering infrastructure with new cellular-enabled technology to enhance drought resiliency and water conservation.	City of Thousand Oaks CA	\$3,500
City of Turlock	Funding to to replace Wastewater Digester originally constructed 1957 and 1963. The capacity is needed to treat 2024 wastewater flows / loads.	City of Turlock CA	\$3,000
City of Turlock	Funding to upgrade advanced water metering infrastructure that provides real-time usage and historical data to customer and operators.	City of Turlock CA	\$2,000
City of Tustin	Funding for design and construction of electrical controls, motor control center, and variable frequency drives at water treatment facility.	City of Tustin CA	\$2,000
City of Whittier	Funding for construction costs associated with modernizing aging drinking water infrastructure.	City of Whittier CA	\$2,490
Central Contra Costa Sanitary District	Funding to replace the remaining aeration tanks' diffusers to increase aeration system performance, optimize the activated sludge process, and reduce energy use.	Contra Costa CA	\$4,000
Central Contra Costa Sanitary District	Funding to update Central San's long-term solids management strategy and install pollution control equipment to better protect air quality, reduce centrifuge energy use by 50 percent, and ensure regulatory compliance.	Contra Costa CA	\$5,000
Central Contra Costa Sanitary District	This project will transition Central San's less energy efficient UV system to a state-of-the-art, energy efficient UV system, reducing disinfection energy demand up to 60 percent.	Contra Costa CA	\$4,000
Central Valley Salinity Coalition	Funding for the development of long-term salt management alternatives for the Central Valley Region by determining appropriate salt concentration targets for surface water and groundwater based on various geographies and local and regional factors.	Counties of Kern, Kings, Los Angeles, and Tulare CA	\$1,000
Alameda County Flood Control and Water Conservation District, Zone 7	Funding for the study and design phase for a PFAS treatment facility.	County of Alameda CA	\$2,400
Town of Paradise	Funding to modernize wastewater collection and distribution in Paradise, CA including collection to the City of Chico.	County of Butte CA	\$5,000
Utica Water and Power Authority	Funding for the replacement and repairs of wooden flumes and concrete-lined canals that supply water to nearly 10,000 people.	County of Calaveras CA	\$300
South Tahoe Public Utility District	Funding to replace existing 2-inch and 6-inch old and deteriorating watermains with larger watermains and new fire hydrants.	County of El Dorado CA	\$1,000
Los Angeles County Department of Public Works	Funding to support conversion of an existing 46-acre inert debris landfill into a multi-benefit park.	County of Los Angeles CA	\$5,000
Santa Clarita Valley Water Agency	Funding to centralize treatment of four groundwater wells impacted by per- and polyfluoroalkyl substances (PFAS) contamination.	County of Los Angeles CA	\$5,000
Los Angeles County Department of Public Works	Funding for a new interconnection between the Los Angeles County Department of Public Works and the Las Virgenes Municipal Water District to secure an alternative water source during emergencies and water supply shortages.	County of Los Angeles CA	\$2,000

Los Angeles County Department of Public Works	Funding to replace an aging, deteriorated water tank with a new 385,000-gallon tank.	County of Los Angeles CA	\$1,500
Los Angeles County Department of Public Works	Funding to divert stormwater and urban runoff from an existing storm drain into biofiltration units.	County of Los Angeles CA	\$1,500
Los Angeles County Department of Public Works	Funding to replace aging and leak-prone waterlines.	County of Los Angeles CA	\$1,200
County of Monterey	Funding to construct a new pipeline to connect to an adjacent community water system.	County of Monterey CA	\$2,000
Costa Mesa Sanitary District	Funding to install a redundancy pressurized-wastewater discharge pipe.	County of Orange CA	\$5,000
Mesa Water District	Funding to replace aging pipelines.	County of Orange CA	\$5,000
Santa Margarita Water District	Funding for the capture and treatment of urban runoff for beneficial use.	County of Orange CA	\$5,000
Orange County Water District	Funding to provide PFAS treatment of drinking water wells.	County of Orange CA	\$5,000
Santa Margarita Water District	Funding for stormwater and recycled water recharge for reuse.	County of Orange CA	\$4,710
Mesa Water District	Funding to replace or decommission mainline valves that have been identified as either end of useful life or inoperable.	County of Orange CA	\$1,500
Mesa Water District	Funding to provide added network reliability and redundancy and reduce online system outages.	County of Orange CA	\$2,393
Serrano Water District	Funding for the construction of two groundwater extraction wells and the installation of a PFAS treatment system to maintain a safe water supply.	County of Orange CA	\$3,000
County of Placer	Funding to increase the capacity of the Highway 49 wastewater trunkline to accommodate planned and approved growth in North Auburn.	County of Placer CA	\$3,000
County of Placer	Funding to modernize two 50+ year old drinking water well sites by adding security measures and offsite monitoring capabilities for drought preparedness.	County of Placer CA	\$1,500
Coachella Valley Water District	Funding to construct a regional stormwater channel which will address regional flood hazards by managing and reducing stormwater flows.	County of Riverside CA	\$5,000
Western Municipal Water District	Funding to construct a recycled water storage tank to accommodate peak flows necessary for new development.	County of Riverside CA	\$5,000
Rancho California Water District	Funding to develop advanced treatment facilities.	County of Riverside CA	\$4,000
Rancho California Water District	Funding for water infrastructure upgrades along the Cleveland National Forest boundary to enhance firefighting and agricultural irrigation capabilities, protecting lives, property, and the environment.	County of Riverside CA	\$4,000
Regional Water Authority	Funding to support the Sacramento Regional Water Bank, a system of groundwater wells, pumps, and pipelines that allow local water providers to pump and refill groundwater reserves.	County of Sacramento CA	\$1,300
West Valley Water District	Funding to construct additional wells and associated facilities to support continued production and distribution of portable water.	County of San Bernardino CA	\$5,000

West Valley Water District	Funding to replace and relocate the aging and undersized waterlines to improve water reliability and ensure fire flow for the protection of the service area.	County of San Bernardino CA	\$3,000
Inland Empire Utilities Agency	Funding for the advancement of three vital pieces of laboratory equipment used to detect, analyze, and quantify critical contaminants in water supply.	County of San Bernardino CA	\$600
Fallbrook Public Utility District	Funding will support replacing critical 80-year-old downtown drinking water distribution pipeline, which has exceeded its useful life.	County of San Diego CA	\$3,800
Borrego Water District	Funding to provide critical infrastructure funding to accelerate replacement of aging water infrastructure.	County of San Diego CA	\$3,600
East County Advanced Water Purification Joint Powers Authority	This funding will support the construction and integration of a dechlorination facility at the East County Advanced Water Purification Facility to support drinking water needs for communities and tribal nations in East San Diego County.	County of San Diego CA	\$1,675
Sweetwater Authority	Funding to replace two aging, leaking water mains causing impairments to the City of East Palo Alto's water supply.	County of San Mateo CA	\$805
Santa Clara Valley Water District	Funding would support environmental planning, design, and early site work for a purified water (direct potable reuse) demonstration facility in San Jose-Santa Clara, the first phase of a full-scale facility that will increase the supply of available purified water for direct potable reuse in Sil	County of Santa Clara CA	\$5,000
Solano Irrigation District	Funding for a project to consolidate two existing public water systems to facilitate connection of existing homes currently using point-of-entry treatment and bottled water for drinking because their existing supply fails to meet drinking water standards.	County of Solano CA	\$3,400
Vallejo Flood and Wastewater District	Funding to rehabilitate sewer system, including pipes, mechanical, and electrical infrastructure on Mare Island, a former U.S. Naval Shipyard.	County of Solano CA	\$2,400
Inyo County	Replace 26,522 feet of antiquated, leaking pipes that are beyond their 40-year life expectancy that run under Lone Pine's roadways and serve residential and commercial properties.	Inyo CA	\$3,000
City of McFarland	Funding for the replacement of outdated water meters to allow for remote meter reading and monitoring to support water conservation efforts.	Kern CA	\$4,200
County Sanitation District No.2 of Los Angeles County	Project to upgrade network control devices at pumping plants, treatment facilities, and the main control center to prevent equipment and system failures and enhance security features.	Los Angeles CA	\$934
City of Signal Hill	To enhance the City of Signal Hill's urban greenscape and implement water conservation strategies through an expanded tree canopy and landscape median improvements.	Los Angeles CA	\$2,670
City of Burbank	To construct the chloramine disinfectant boosting system to ensure clean drinking water for the city of Burbank.	Los Angeles CA	\$3,000
Sanitation District No. 20 of Los Angeles County	Project to rehabilitate miles of aging non-reinforced concrete sanitary sewers to prevent sewer failure and sewage overflows by lining the pipes with non-corrodible pipe.	Los Angeles CA	\$5,000
Los Angeles County Department of Public Works	Project to improve Marina Del Rey Harbor water quality by diverting polluted stormwater and urban runoff from existing storm drain inlets into underground filtration devices for treatment.	Los Angeles CA	\$1,500
Rose Bowl Operating Company	This funding will support the repair and replacement of aging water and wastewater (sewer) lines.	Los Angeles CA	\$3,500

Madera County	Project to replace portions of the Madera County's water distribution system.	Madera CA	\$5,000
Madera County	Funding for planning and design phase of project to rectify arsenic contamination in the water supply of North Fork, CA, and improve water system efficiency through the consolidation of multiple smaller systems.	Madera CA	\$1,500
Novato Sanitary District	Upgrade existing electrical equipment for improved energy efficiency; improve the quality of discharged effluent into the San Francisco Bay helping to address water quality impairments such as nutrient loadings; and reduce electricity demand through the installation of smart blower and pump tech.	Marin CA	\$3,000
City Seaside	Project to design and construct a backup potable water well for the Seaside Municipal Water System to ensure an adequate supply of clean, affordable, and reliable water for residents.	Monterey CA	\$3,200
County of Monterey	The proposed project will improve the infrastructure that ensures reliability of the Castroville Seawater Intrusion Project.	Monterey CA	\$3,000
Monterey One Water	The proposed project will provide two 1,000 kW natural gas fueled generators with modern air emissions control equipment. The generators will serve as standby, emergency power for Monterey One Water's wastewater and water recycling campus in northern Monterey County.	Monterey CA	\$1,600
County of Monterey	This project consists of replacing and repairing sanitary system sewer pipes in the Pajaro County Sanitation District .	Monterey CA	\$2,000
The Napa Communities Firewise Foundation	The project will fund the creation of priority fuel reduction buffers to protect the critical infrastructure of the Adventist Health Hospital and its water supply. In addition, key access and evacuation routes will be improved for residents and first responders.	Napa CA	\$1,800
County of Nevada	Improve, connect and construct 5 miles of multi-use trail and improve 3 miles of road to enhance equitable access and environmental quality. The project is the last restoration action for the larger meadow restoration effort restoring hydrologic processes and reduce erosion in the Van Norden Meadow.	Nevada CA	\$2,000
East Orange County Water District	Project to build a sewer main line near a high concentration of properties that are on septic systems, remove septic tanks, and switch property owners over to the local sewer.	Orange CA	\$2,000
Tahoe City Public Utility District	Funding to replace the original 1940's infrastructure of the Madden Creek Water System to ensure customers have reliable drinking water and sufficient fire suppression capabilities.	Placer CA	\$2,000
North Tahoe Public Utility District	This project will accelerate the work to create fire-resilient communities in North Lake Tahoe by replacing old and undersized water pipes and installing new fire hydrants to provide adequate wildfire suppression water supplies to the Kings Beach community.	Placer CA	\$2,000
Riverside Art Musuem	For the purchase and installation of an upgraded commercial museum-standard HVAC system for the historic 1929-Julia Morgan building.	Riverside CA	\$500
Valley Sanitary District	This project will complete the studies, reports, and construction documents necessary to expand and upgrade the Water Reclamation Facility to accommodate Title 22 tertiary treatment for the purpose of beneficial reuse.	Riverside CA	\$1,900
County of Sacramento	Funding to meter approximately 3,000 water customers who have unmetered water connections and make water efficiency improvements.	Sacramento CA	\$2,000

Carmichael Water District	To construct three new wells with underground water storage capability when water from the American River is available during wet years to provide additional water supply reliability for the residents of Carmichael.	Sacramento CA	\$2,100
West Valley Water District	Project to upgrade the Supervisory Control and Data Acquisition system to ensure water reliability during a cyber attack.	San Bernardino CA	\$3,100
Inland Empire Utilities Agency	This project will construct the Inland Empire's first ever Advanced Water Purification Demonstration Facility advancing research, innovation, and education and supporting water supply resiliency for the region by guiding future full-scale Advanced Water Purification Facilities for San Bernardino.	San Bernardino CA	\$3,000
Water Facilities Authority	Funding would be used for a taller signal communication tower, programable logical controllers, remote telemetry units, sensors and actuators, software, and antennas.	San Bernardino CA	\$495
Mojave Water Agency	Funding for this project will help build vital infrastructure needed to deliver State Water Project Water from the California Aqueduct to the severely disadvantaged Oeste Subarea.	San Bernardino CA	\$1,500
City of Oceanside	Funding will support the centralizing of all reuse source flows to the San Luis Rey Water Reclamation Facility; home of Pure Water Oceanside, San Diego County's first potable reuse project and tertiary recycled water treatment facility.	San Diego CA	\$2,000
San Diego Zoo Wildlife Alliance	For the expansion of the San Diego Zoo Wildlife Alliance's Frozen Zoo and Native Plant Gene Bank which hold critical cell lines and seeds for biodiversity of animals and plants, many specific to Southern California endemic species.	San Diego CA	\$1,000
City of Coronado	The City of Coronado Stormwater Mitigation Project is a stormwater / wastewater project that will protect surface and ground water quality and assist with minimization of pollutants entering the water ways.	San Diego CA	\$1,600
U.S. Fish and Wildlife Service	This funding will support the emergency storm-driven needs of the Don Edwards San Francisco Bay National Wildlife Refuge to address damaged infrastructure including levees and water control structures which provide flood protection for Silicon Valley.	San Francisco CA	\$2,900
Stockton East Water District	To construct a new fish passage and modify the existing Bellota Weir and intake structure to allow for proper fish passage, reliable water diversion, and accurately measured flow.	San Joaquin CA	\$5,000
Port of Redwood City	The project upgrades stormwater and sewage infrastructure at the Port of Redwood City. It will overhaul the Port's stormwater and sewage infrastructure by modernizing lift stations, pumps, pipelines, and related electronic controls and conduits.	San Mateo CA	\$615
City of East Palo Alto, California	Funding to replace two aging water mains that are leaking and causing impairments to the City of East Palo Alto's water supply.	San Mateo CA	\$1,000
City of South San Francisco	To construct a new sewer force main parallel to existing pipe originally installed in 1956. This main sewer pipe has no redundancy and should it fail, residents and employers east of highway 101 are at risk of a potential system failure.	San Mateo CA	\$2,000
Town of Windsor	For the construction of a Blower Facility, as well as site preparation and installation for Return Activated Sludge and Waste Activated Sludge pumps.	Sonoma CA	\$1,900
Sonoma County Water Agency	Increase capacity enhancements at the Russian River County Sanitation District wastewater treatment system to prevent the release of raw sewage that sometimes occurs during Russian River flood events.	Sonoma CA	\$1,500

County of Sutter	This project would support a backup power generator to ensure reliable sewer service for the rural community of Robbins, which experiences frequent power outages.	Sutter CA	\$400
City of Tulare	Project to upgrade network infrastructure control systems for the City of Tulare's wastewater treatment facilities.	Tulare CA	\$1,500
City of Camarillo, California	This project will construct a new parallel sewer pipeline that will serve as the backbone to the Camarillo Sanitary District's sewer system.	Ventura CA	\$1,500
